

- 5,0" LCD color TFT-Display 320x234 Pixel
- Touch operating
- Keypad with 18 buttons
- Onboard: RS, CAN and Ethernet
- Extendible to compact-control with COM-I/O moduls
- Memory extendible over CF-Cards

Attributes

- Display Color-LCD/TFT 5,0" 320x234 Pixel
- Memory 1,5MB RAM, 2MB Flash, 2 KB EEPROM
- Memory-Card optional Compact Flash Card Typ 1 16MB... 512 MB
- CPU Infineon SAB C16x 16Bit/30MHz
- Keypad Flex panel with 18 keys
(optional Touch-Screen)
- Interfaces RS232, CAN, Ethernet
- Fieldbusinterface CANopen (Slave on board)
optional: CANopen-Master, Profibus-DP, Interbus, DeviceNet, AS-i-Interface,
..... connect over COM slot
- Battery 1Ah, Service-life 2 year
- optional:
- PLC-Programming: IEC 61131/CoDeSys
..... (supported existing CANopen Interface)

Connectors

Electrical Data

- Power supply external +24V DC (18...30V DC), reverse battery protection
- Power consumption 15 – 20W (depends on added modules)

TR-Systemtechnik GmbH, Eglisshalde 16, 78647 Trossingen, Tel.: +49 (0) 7425 228-0, Fax: +49 (0) 7425 228-34, www.activeio.de, info@tr-systemtechnik.de

@D300T-Panel

Mechanical Data PCB

System IDCustomised

Environmental Conditions

Electromagnetic compatibility (EMC)EN50081-2, EN50082-2
Operating temperature [°C]0° ... 50°C
Storage temperature [C].....-10° ... 60°C
Humidity (rel).....90 % (non condensing)
Protection class*.....IP 65 (DIN 40 050)
*The protection class is only valid if mounted in housing

System Information

WeightApprox. 1,950 kg
Dimension175x128,7x60

Possible applications for the monitoring and guidance of the control unit.

Example 1

Visualisation

@D300 T-Panel

PLC/ Fieldbus knot

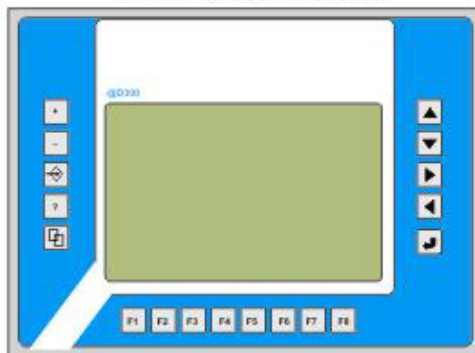

@PLC-Cxxx

COMLINK RS232

Example 2

PLC/ Visualisation

@D300 T-Panel

Fieldbus knot

@Cxxx

Fieldbus
(Profibus-DP, CANopen, etc)

@D300T-Panel**notes:****Application**

The Panel @D300 is special for the use in the areas: industry, craft etc. developed.

Variable configurations enable a system-spanning application.

Central control and regulation, that means, that with the integrated I/O Module the sensor signals can be evaluated and the actuator can be controled.

Decentralized system that means that the panel can be used as Master who controls different I/O-Moduls by fieldbus.

System with distributed intelligence enables the construction of a network in the most different topologies. So it is possible over Ethernet with one or several IT-building groups to communicate. In addition can be communicate with further building groups over CAN.

Function**Display**

The Panel @D300 draws itself through an illuminated graphic arts capable TFT-display with 320 xs 234 points from. This enables a good and fast read of the represented values and graphic arts.

Software**EStudio**

Softwaretool to programming-, development- and simulation of control tasks with an extensive project administration. PLC programming with IEC 61131/CoDeSys.
